Education

University of Utah

Bachelor of Arts in Computer Science

Salt Lake City, UT

Expected Fall 2026

- **Relevant Coursework:** Data Structures, Algorithms, Data Wrangling, Computer Vision, Mobile App Programming, Human Center Design, Engineering Probability & Statistics, Linear Algebra, Discrete Mathematics, Calculus II & III
- **Activities:** Technical Coding Club, Software Development Club

Experience

Adobe

Student Ambassador

Spring 2026 - Fall 2026

Hybrid

- Promote Adobe products through engaging content and creative campaigns across personal social media platforms
- Inspire and support peers by showcasing how Adobe Express can elevate both academic and personal projects

Sapa Investment Group

Software Engineer Intern

July 2026 - Present

Remote

- Designed the production marketing site for a 2-location organization on Next.js and React, deployed on Vercel
- Integrated Toast API to pull 268+ items, prices, and sold-out status directly from the client's point of sale, eliminating manual menu updates

Selected Projects

Manual Driving Simulator | C++, Qt, Qt Creator

- Developed a desktop-based manual driving simulator using Qt Creator, allowing users to control a vehicle in a simulated environment with real-time visual updates
- Implemented event-driven input handling through Qt's signal-slot system to process steering, acceleration, and braking interactions
- Designed a user-friendly interface with interactive controls and real-time visual indicators to enhance usability and driving feedback

Snake Client & Score Server | C#, .NET, MVC, SQL Server, TCP/IP, HTTP

- Developed a networked Snake client that records live game and player data to a SQL Server database, designing relational schemas for games, players, timestamps, and max scores
- Built a lightweight HTTP web server from scratch to dynamically render game history and per-game statistics, implementing proper HTTP/1.1 headers, content length, and UTF-8 encoding

SpriteEditor | C++, Qt, Qt Creator, qmake

- Designed and implemented a desktop sprite editor supporting multi-layer editing, per-pixel drawing tools, onion skinning, frame-based animation, and animated sprite export
- Built an event-driven GUI using Qt's signal-slot architecture to manage real-time user interactions between tools, layers, canvas updates, and playback controls

Personal Website | Next.js, React, Tailwind CSS, TypeScript

- Built a minimalistic personal website displaying experience, about, contact and resume

Skills

Languages: C/C++, Python, Java, TypeScript, JavaScript, HTML/CSS, SQL

Developer Tools: Git, Next.js, React, Node.js, Tailwind, Excel

Concepts: Software Engineering, Data Wrangling, Object-Oriented Programming, Computer Vision, Frontend, Backend
